South Lake

Messrs. Taylor, Spink and Hider, of Toronto, Mr. and Mrs. Forsyth and Miss Edith Forsyth, of Lindsay, are holidaying at Birch Beach Farm.

Mr. and Mrs. Swinton and Miss Thelma Swinton, of Toronto, are at Mrs. Wm. Hamilton's.

Mr. J. Knowles and Miss Glyn, of Toronto are at "Fairview."

Miss Doris Dark is spending a few weeks with her parents.

Tory Hill

Mr. Arthur Short has returned to Toronto after spending his vacation with his parents.

Master Don. Finlay, accompanied his cousin, Donald Finlay, to Cleveland, Ohio, where he will finish his vacation.

Mr. R. E. Johnston has moved into the boarding house on Main street.

Amongst those who left for the West on Monday were Messrs. Jesse Short, W. Dundas, Harry Woods and Stanley McCrea.

Mr. Fred Watson has purchased a Ford car.

Masters Jack and Arch, Anderson, of Lindsay, are holidaying in town.

The Tory Hill Football Team gave a dance on Friday night. Everyone reported a good time.

Mr. Roy Bonham, of Toronto, is spending his vacation with his parents here.

Mr. and Mrs. R. C. Short gave an enjoyable dance on Tuesday evening in honor of their sons, Bert and Arthur.

Miss Edith Anderson, of Toronto, spent the week-end with her mother, Mrs. J. H. Anderson.

Mr. and Mrs. J. E. Finlay have returned from a motor trip to Toronto, Whitby and various points.

Mr. F. D. Herlihy purposes moving into the residence vacated by R. E. Johnston.

Gelert Gleanings

(Too late for last week)

Mrs. Gray, who has been visiting her daughter, Mrs. Harold Scott, has returned to her home.

Mr. and Mrs. A. Barber, Mrs. J. Barber and Miss May Barber motored to Fenelon Falls and Bobcaygeon last week.

Mr. J. Cunningham has returned to Toronto after spending a few days with his mother, Mrs. A. Barber.

Mr. and Mrs. Sam Walsh and daughter, Mr. and Mrs. J. Bowering and daughter and Mr. John Barber, all of Toronto, motored to Mr. Barber's cottage for the week-end.

A dance was held at the home of Mr. and Mrs. A. Barber, in honor of some Toronto friends. Among those present were Mr. and Mrs. S. F. Walsh, Miss M. Walsh, Mr. and Mrs. J. Bowering, Miss J. Bowering, Mr. and Mrs. H. Scott, Mrs. H. Hannah, Miss M. H. H. Mr. and Mrs. R. Hanthorn, Misses Hanthorn, Mrs. John Barber, Miss May Barber and Miss F. Gray.

Mrs. Hughes and her daughter, Mrs. George Bowhey, of Lindsay, were the guests of Mrs. W. F. Ritchie over the week-end.

Those from our vicinity who went West for the harvest were, Messrs. Wm. Seamer, N. Anderson, Ed Sharpless, Leslie Hagan, Wesley Sargent, Harold Sedgwick and Rodney Walker.

Miss E. Wilson, of Kilmount, is spending some holidays with her grandparents, Mr. and Mrs. Ritchie.

Mr. Farley Fountain is home from Cobocok.

Mr. S. B. Alsop visited his brothers at Uxbridge this week.

Gooderham Gleanings

There are a number of the young men from the village taking in the harvest excursion, among them are, J. Hadley, Robt. Hunter, Jack McLeod and N. Billings.

Mr. and Mrs. Stanley MacWell spent a few days with his mother here.

Mrs. Savage, accompanied by her daughter, are visiting with her aunt, Mrs. G. Waite.

Miss Walsh is spending the holiday with Mrs. Jerrey Hadley.

Miss Grace Seriner left on Wednesday last for Peterborough and other points.

Mr. J. MacGill, of Orillia, is spending his holiday at the home of Mr. J. M. Pickens.

Mrs. Thos. Madill was taken to the hospital on Friday. We sincerely hope the case will not be serious.

We are glad to report Mrs. Carmichael getting along fine.

Mr. Harvey Rose spent the week-end at his home here.

We, as a community, extend our deepest sympathy to Mr. and Mrs. Flood, of Irondale, in the loss of their son.

Donald Doings

(Too late for last week)

Mr. Sam Pasquino has returned from Burnt River and is once more employed at the Chemical Plant.

Mr. Frank Bidwell is here once more as foreman for the Standard Chemical Co. Welcome back, Mr. Bidwell.

Miss Ina Watt has returned to Longford after spending a pleasant month with her aunt, Mrs. Harvey Watt.

Mrs. R. Hunt and Miss Annie Tripp, of Toronto, are visiting their parents, Mr. and Mrs. P. Tripp.

Mr. W. Willis, of Haliburton, called on friends here one day last week.

Masters Donald, Walter, Earl, Allan and Wallace Cowen, of Gould's Crossing, spent a holiday with their young friends, Ralph and Margaret Pasquino.

A most enjoyable party was given by Mrs. May Brohm and Mrs. Elsie Wruth, one evening last week, quite a few attending from a distance. Among those present were our old neighbors, Mrs. W. Kellett and Mrs. Chester Kellett, of Haliburton.

A party from the boarding house had a most enjoyable motor ride Sunday evening.

A few from here attended the U.F.O. picnic held in Mr. English's grove, Lochlin, all report a most enjoyable time, among them were Mr. and Mrs. I. Lawson and family and Mrs. Watt and family.

Mr. Thos. Cowen, of Gould's, visited acquaintances around here Monday evening.

Lochlin Locals

Mr. and Mrs. McKay and Miss Sadie Emerson, from Toronto, recently visited Mr. and Mrs. D. Emerson.

Miss Vera McKnight, of Toronto, is home for a holiday.

Mr. and Mrs. James Deere and Mr. and Mrs. Brock and Miss Nora Harrison, of Toronto, visited Mr. and Mrs. Henry Harrison recently.

Misses Brown, from Dunnville, are visiting their sister, Mrs. Harold Hill.

Mr. Claude Pringle recently visited friends at Bear Lake.

Messrs. Harold Northcott, Alvin St. Peters and Bert Hicks left last week for the West on the harvest excursion.

Mr. and Mrs. Wm. Parks, of Tweed, visited friends here last week.

Misses Violet and Muriel Hill are visiting friends in Minden.

Mr. and Mrs. B. McKnight and Mrs. J. McKnight, from Toronto, recently visited Mr. and Mrs. John Hogg.

Mr. Joseph Hunt, of Bear Lake, visited at Mr. L. Pringle's early in the week.

Mrs. Stead, from Toronto, is visiting her daughter, Mrs. D. Emerson.

West Guilford

Mr. Richard Johnson and son and his family, of Toronto, made a short visit with her sister, Mrs. James Upton and other friends here and is now visiting friends at Hall's Lake.

Miss Beatrice Clark and friend, Miss Mann, of Toronto, are holidaying at the former's home here.

The Orange Picnic on the 11th was a success. Everybody had a very enjoyable time, the weather being ideal and several carloads of people coming from Haliburton, Maple Lake, Carnarvon and Eagle Lake.

The Gull River Lumber Co. have completed their season's lumber cut here and are preparing for the bush again.

Mr. and Mrs. Geo. E. Roe returned home last week after visiting friends in Barrie, Elmville, Toronto and other points west. They were accompanied home by Mrs. Roe's sister, Mrs. McGuire, and son, Donald, of Elmville.

It looks as though we will soon be able to communicate with the outside world as the phones are put in as far east as I. A. LaRue's, but our central is not completed yet.

Mr. and Mrs. John Lucas and Mr. and Mrs. H. Pallen, of Haliburton, were visitors at Mr. and Mrs. E. A. LaRue on Sunday last.

West Dysart

Mr. Thomas Parish has sold his farm to Mr. Melville, of Hamilton, and has moved to Port Hope. We wish him success in his new home.

Miss Margaret Stothart, of Peterboro- is visiting with her parents here.

Miss Elsie Dugan arrived home on Thursday from Bracebridge where she has been attending summer school.

Messrs. Fred Parish and Richard Hulse broke left on Friday last for Peace River.

Mr. and Mrs. William Stothart celebrated the 25th anniversary of their wedding on Friday last. Quite a number was present and spent an enjoyable evening. They received a large number of presents.

About the House

Keeping the Weeds Down.

It seemed as if the parting of the ways had come—the ways of mother and daughter.

Molly was fifteen. Up to this summer, she had never wanted to go anywhere or do anything without mother. Now, she had fled to her room,—after a cold, perfunctory kiss in place of the hug that was her usual good night,—fled in angry tears, because her mother had refused to allow her to spend the night with her chum.

The mother, alone downstairs, was most unhappy. She realized that her child must have girl friends, but Molly's choice of a particular friend distressed her. She knew little of the girl, or of her relatives, but from her free-and-easy deportment, her use of slang and her general conversation the mother argued that the intimacy could not be beneficial.

So, long into the night, she sat downstairs, alone, thinking, hoping, planning.

The next day was Saturday. Molly belonged to a tennis club that met every Saturday afternoon.

"Bring the girls home to tea, dear," suggested the mother, as Molly, very fresh and pretty in white duck skirt and middie blouse, tennis racket and shoes slung over her shoulder, was about to start.

"Thank you, mother," said Molly, rather coldly. She was still on her dignity. Other girls slept about variously with their friends. Why couldn't she?

However, the temptation to extend hospitality was not to be resisted. Therefore, the mother, watching the garden gate late that afternoon, saw with pleasure a group of girls, very pretty in their gay-colored sweaters, preceding her daughter along the garden path.

Molly, on her part, was frankly delighted and proud when she saw her mother prettily and effectively dressed, and the drawing-room at its best, gay with flowers, shining with care. The tea table, set near the open window by the verandah, was a picture. It held not merely delicate sandwiches and tempting cookies, iced tea and lemonade but the very best china and the embroidered tablecloth—everything that was used for the most important company. And a friend of her mother's, also dressed as for an important occasion, was pouring tea.

The little festival was a great success.

"Molly will have tea every Saturday," announced Molly's mother, as the guests departed. "We shall always be glad to see you."

When they were alone, Molly rushed to her mother and hugged her, to the detriment of her gown.

"You're an angel, mother," she cried. "Giving my friends the best of everything!"

So their ways were one again. The fanger was over; for the "chum" did not come back on any subsequent Saturday. The slight effort required to keep her own language and deportment up to the standard of Molly's home was a little too much.

Thus Molly's friendships were formed, little as she knew it, by the principle of the survival of the fittest. She found those girls most congenial who seemed to fit into her home. Years later she understood and blessed her mother's wise censorship.

Canning Huckleberries.

For canning huckleberries practically the same methods of canning may be used as with other berries.

Glass jars or enamel-lined cans are needed. The condition of the fruit will have much to do with the quality of the product. Berries should be gathered in shallow trays or baskets, and not in deep vessels which allow them to be bruised or crushed. They should be uniformly ripe and sound, and as large as possible. Clean the berries carefully, removing stems and leaves. Place a shallow layer of berries in a large colander or strainer and wash carefully by pouring water over them. Pack in cans as closely as possible without crushing. This may be done by putting a few berries at a time into the can and gently pressing them into place. Three-fourths of a pound, or three-fourths of a quart of most berries measured as purchased, will pack into one No. 2 can or pint jar. Fill can with hot medium syrup, seal and process in steam cooker. No. 2 cans or pint jars, ten to fifteen minutes. No. 3 cans or quart jars, fifteen to twenty minutes. Remove cans, cool quickly in cold water, wipe, dry, label and store away. Glass jars are removed and sealed at once.

If, in making the syrup for berries, the berry juice is used instead of water, the resulting product will be much better, both in color and in flavor.

Salad Dressing.

Any mayonnaise dressing is as good as you buy in bottles, if it is made with the best of materials, pure olive oil, a good grade vinegar, and fresh eggs. Here is a recipe for mayonnaise.

Two egg yolks, one teaspoon salt, one-fourth teaspoon cayenne, one teaspoon mustard, one tablespoon vinegar, one tablespoon lemon juice, one cup olive oil, one-fourth teaspoon paprika.

Mix dry ingredients and add egg yolks. The dry ingredients are mixed best and most quickly by using a sieve. Then beat until the egg yolks thicken slightly. Add olive oil drop by drop and beat until thick. When four tablespoons of olive oil have been added, it may be added faster. When the mixture gets too thick thin with the lemon juice and vinegar.

To make Thousand Island dressing, add one cup of chili sauce to half the quantity of dressing you have made.

Boiled Salad Dressing.—One tablespoon sugar, one teaspoon each of salt, mustard and flour, one egg, one-half cup milk, one-fourth cup vinegar, tablespoon butter. Thoroughly mix dry ingredients, beat in the egg, add milk, stir well, and put in double boiler. Add the vinegar slowly as the

mixture cooks, stirring constantly. When thickened, remove from fire and add butter. A second egg yolk may be substituted for the flour. The recipe may be doubled or trebled.

Making Fudge.

Fudge is really nothing but flavored fondant. That is, it is flavored sugar—melted by a hot liquid and heating it—then crystallizes when it becomes cold. For good fudge the crystallization should take place rapidly, so that the crystals will be very small. If it occurs slowly the crystals have time to grow large, and that makes the fudge gritty. In making pure fondant from unflavored sugar—such as is used for filling chocolate creams—no undissolved crystals should be left in the hot fondant, for if there were any they would start a growth of coarse crystals while the mass was cooling. Stirring the fondant vigorously when it is cool forms the crystals all at once in the desired degree of fineness; but it is possible to make delicious fudge without being so careful about the undissolved crystals, because if you immediately cool and stir the mixture in a panful of water the crystals will not have time to form.

Have the proportions of liquid and sugar just right. If you use too much liquid the crystals will form slowly and the mixture will be gritty. If you use too little, the fudge will set to a dry hard mass in the pan before you can scoop it out. Most fudge makers put in too much liquid at the start and have to boil it out—and unscientific procedure that wastes time. It is possible to measure the ingredients so exactly that the fudge is ready to cool and stir by the time they have been melted by heat, and before they have been boiled at all.

When that is done there are usually a few crystals left undissolved. They will not seriously affect the fudge, but it is better to add at the start about half an ounce more of liquid than the exact amount required, and to boil that off in about thirty seconds.

One pound of sugar, three fluid ounces of milk, three ounces of fine-grated cooking chocolate and one ounce of butter are the right proportions for a standard fudge mixture. A few grains of salt will improve the flavor. When you have cooked the mixture add a teaspoonful of vanilla extract.

Do not pour the fudge out without first stirring it. Do not stir it so long that it sets in the saucepan. Place the saucepan in cool water and stir the mixture. At the first sign of stiffening, scoop it quickly into a buttered tin.

When a sample of the fudge dropped into cold water is just too soft to be rolled between the fingers to a soft ball the fudge is cooked long enough. It should not taste gritty; if it does, add an ounce of water and boil the mass up. If it is of the right consistency. If it is too hard, but is smooth and free from grit, add one tablespoonful of water and stir and test the mass again, but do not cook it again.

It saves time to measure the milk in a glass graduated marked in ounces, and to measure the sugar in the same cup every time.

Few of the substances used to flavor fudge will affect seriously the crystallization, and if either is added in suf-

and the worst is yet to come

ficient quantity it will form the whole mass into a caramel mixture.

For a fair substitute for maple sugar omit the chocolate and the butter in the recipe given above, flavor the mass with half a teaspoonful of maple extract and a teaspoonful of vanilla and add a pinch of salt. The recipe is economical, and it is easy to double the quantities if you wish.

Honeymoon Island.

A romantic superstition has earned for Norfolk Island, in the Pacific Ocean, the nickname of "Honeymoon Island." It is believed that if the first month of married life is spent there the couple concerned will enjoy long life, health, wealth, and happiness.

Without this legend it would be a dead place for a honeymoon, for it has been called the most beautiful spot on earth.

This earthly paradise started its career as a convict station. The history of those early days is a tale of horror. Ruins of the famous "silent cells" are still to be seen.

These cells, made of concrete, four feet thick, were just large enough to enable a man to stand up or lie down. On the walls can be seen the prayers carved by convicts. Known as "the tombs," the silent cells provided the worst form of punishment, and those confined in them rarely came out sane.

Hardly a day passed without a murder taking place, and the convicts became worse than savages. Some even became cannibals. How many executions took place in the island will never be known. The convict settlement eventually abandoned and for a year the island was deserted except for a caretaker.

Finally a shipload of settlers arrived from the island of Pitcairn. These were the descendants of the mutineers of the "Bounty," a British warship. They had intermarried with Tahitian women, who are famed for their beauty.

There are only eight families on the island. Money is very scarce, five pounds being all that is handled in the course of a year. The islanders, however, are entirely self-supporting, and have everything they need, as well as a number of luxuries. The island has its own Government, which is presided over by a governor sent out from Australia.

Poisoned Arrows.

Practically all Central and South American Indians (such as use poisoned arrows at all) use the same poison—the dried juice of species of Strychnos. Its physiological action is to paralyze the end-plates of motor nerves. Thus, without affecting the central nervous system at all, it causes complete paralysis of all muscles. Death is due to paralysis of heart and respiratory muscles. Curare, as it is called, has no other action; it does not affect consciousness nor is it anesthetic. The important and interesting thing about curare is that it is inert unless introduced into the body fluids. It can be swallowed even in large quantities without ill effects, because it is broken up in the stomach by the digestive process. Introduced into the blood stream, however, by hypodermic injection, or by a dart, knife or arrow impregnated with it, curare is highly poisonous. It acts almost instantly, paralyzing all muscles, so that its victim drops at once, inert. And that victim may be eaten with impunity, because curare is broken up during digestion.

Secrets of the Sea.

There was a time in the earth's history when there was no sea. The surface of the young earth was too hot to allow the accumulation of water in basins. More than that, there were no basins, for the surface of the earth must have been at any one place as flat as a pancake.

On an average there are three and a half pounds of salty material to every hundred pounds of sea-water. More than three-fourths of the salts in the sea consists of common salt (sodium chloride).

Different parts of the surface of the sea vary markedly in salinity, for it will increase where evaporation is great (as in the Red Sea) and decrease where the rainfall is heavy, or where there is a little wind and much precipitation. In a general way the salinity corresponds with the climate.

The total surface of the globe occupies about 197,000,000 square miles, and about 71 per cent of that area (namely, 140,000,000) belongs to seas, oceans and lakes.

Soundings have been taken in all parts of the navigable globe, and we know that the average depth of the sea is about two and a half miles.

Heat rays are lost at 250 fathoms, and even in the tropics the upper stratum of warfah water is comparatively thin. The great bulk of the water in the oceans is cold. In the great depths the temperature is a little above the freezing point of fresh water. The ooze dredged from the ocean floor in the tropics is so cold that it cannot be handled without discomfort.

It is calculated that at a depth of 2,500 fathoms the pressure of the sea is at 2½ tons per square inch.

There is no foundation for the sailor's common belief that ships and men sink until they "reach their level," and then remain suspended. Everything sinks to the bottom.

When a deep-sea fish rises above its usual zone in pursuit of its prey, the decrease of external pressure brings about an expansion of the gases in the swim-bladder, and the specific gravity of the fish is reduced. The result is that, in spite of its efforts, the fish "tumbles upwards" to the surface, and is killed sooner or later by the distension of its organs.

Dr. H. R. Mill gives a quarter of a mile as the greatest length of a wave from crest to crest, and 50 ft. as the maximum height. But the bell of a lighthouse on one of the Isles of Scilly was wrecked off by a breaker at a height of 130 ft.

There is probably far more living matter in the sea than there is in all the rest of the world.

The height of Lake Ontario above sea level is 246 feet.

There is no goal worth reaching as near as it appears to the hopeful, nor as remote as it seems to the timid.—Mr. Lloyd George.

Work then for pleasure, pain or grief or care. The thing thou lovest, though the body starve. Who works for glory misses off the goal. Who works for money coin, his very soul. Work for working sake, then, and it will may be. That these things shall be added unto thee.

—Kenyon Cox

Many people can't drink tea or coffee without punishment

If you are nervous and irritable—if you lie awake at night—if you are troubled with indigestion—try Instant Postum for ten days and note the improvement in your health.

You have nothing to lose and everything to gain. The full, rich flavor of Instant Postum makes it a most delightful, satisfying beverage, and the results of its use, instead of harmful table beverages, are a clearer head, sounder, more refreshing sleep, and a fuller, healthier enjoyment of life.

This happy, wholesome beverage gives you all the pleasure and satisfaction of your usual steaming cup of flavory delight, but exacts none of the penalties which follow the use of harmful table beverages.

At your grocer's in sealed, air-tight tins

Instant Postum

TOO LITTLE BLOOD

Cause of Nearly All Every-day Ailments of Life.

Little blood is what makes people pale and sallow and feel languid. That is what makes them drag along, always tired, never real hungry, unable to digest their food, breathless after slight exertion, so that it is wearisome even to go up stairs. Doctors tell them they are anæmic—the plain English being too little blood. If you do not relish your meals, if you are easily tired and frequently despondent, and small matters irritate you, it is a sign that your blood is thin, very, and that you are on the way to a breakdown.

Weak, anæmic people have no strong, energetic and cheerful. Dr. Williams' Pink Pills for Pale People is the only other means. These pills renew every part of the system, strengthen the nerves, and give new health and vitality. Miss M. E. Davidson, Sask., says: "I have found great benefit through the use of Dr. Williams' Pink Pills. I was weak and run down and seemed to have no ambition, but after taking the pills felt restored. I shall be glad to recommend them to any sufferer."

If you are suffering from any condition due to poor, watery blood or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your health and strength will improve. You can get these pills through any dealer in medicine, or they will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

Do You Murder English?

There are a few common errors of speech which a little watchfulness would cure.

Even well-educated people are guilty of saying "lor" for law, and "sor" for saw, and thousands of grown-ups speak of "jography" and "gramma" and "rithmetic," habits of speech which ought at least to be left behind with schooldays.

How many people sing a "chune," take the "opporchunity," play as in "arachure," and admire "nachur" in the spring.

Many people have trouble with the verb "to lie." They say, "She has just led down," or "She was laying down when I called," or "She was laid down." They say also, "She was laid there, fast asleep." All these are in-

Some minds seem to be always growing, always susceptible to new ideas. These minds never seem to reach the limit of expansion. No matter how old these people may be in body, their minds are always young, responsive, fresh, vigorous, impressionable. The habit of inquiry, of pushing out into new fields, of learning new things, constantly follows them to the very last. There does not seem to be any limit, any bounds to their growth.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON
Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Partridge Island is the "Public Health watchdog" for St. John, N.B., and incidentally one of the watchdogs for Canada. On this rocky island the quarantine station stands, the station where immigrants suffering from infectious diseases, or contacts, are detained till they are no longer a menace to the public health of the Dominion. Probably the most up-to-date quarantine station on the American continent is nearing completion on that little island guarding the harbor entrance at St. John. A signal by wireless announces that a steamer, not yet visible on the horizon, is coming up the Bay of Fundy from a foreign port. The wireless message includes the name of the ship, the flag she flies, where she comes from and whither she is bound. This information is immediately transmitted to the Port Health Officer on Partridge Island. Sometime later, a definite number of blasts from her whistle announces that the steamer is approaching the quarantine station and calling for a doctor, who has to go aboard and inspect the entire ship's personnel of passengers and crew. While I was attending the Public Health Congress in St. John, N.B., I visited the quarantine station on Partridge Island in company with the Port Health Officer, Dr. Rutherford. The new building that is now nearing completion will include the receiving and disinfecting of im-

stances of careless and incorrect speech.

Tennis players say, "He won me that last set," and numerous people use "learn" as the equivalent of "teach." They will say, "Hobbs learnt him to bat."

A common error is to say, "I must of been mad!" and "Break a bit off of it." The latter has the merit of being an old English form, but it is obsolete and is never used by the best speakers.

It is not always that architect is pronounced "arkitect," although it should be, and many people speak of going "to the pickchers" and, indeed, of going "offen."

Even members of Parliament have been heard to say that certain measures would "affect a great saving," and to speak of "cause and affect."

It is said that a certain professor was caught by his wife kissing the maid. She said: "I am surprised!" "No, my dear," he said. "I am surprised you are astonished."

Growing Forests for Use.

Under the heading of "Silviculture" are grouped all the operations connected with the handling of timber on the Dominion forest reserves, looking to the development of the same as a growing crop and to its ultimate harvest. The object is not only to provide the surrounding communities with all the fuel and timber possible for the next few years but also to get the forest into the highest state of production, so that the largest possible supply of good timber may be available from each of these forests in perpetuity. To this end efforts are directed toward the cutting of mature and over-mature timber, and especially to the removing of all dead and diseased trees, that a new crop may spring up and grow as speedily as possible. The cutting is closely supervised to prevent waste in high stumps and large tops left in the woods, and to see that all the slash from the cutting operations is piled and burned, so as to remove this form of fire-hazard.—Annual Report, Director of Forestry, Ottawa.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Certain flowers have their likes and dislikes. Sweet peas fade at once when put in a vase with other flowers. Mignonette, lilies-of-the-valley, and certain kinds of poppy also have no friends in the flower world.

Tree With Strange Flowers.

For many years scientists and explorers have been searching for a drug which was said to be used by the natives of South America to give them courage before going into battle.

Its long-delayed discovery has been announced by the leader of the Mulford biological expedition, which has just returned to England from South America. The drug, which is known to the natives who use it as caapi or ayawasco, was obtained in tiny quantities by the leader of the expedition, and it is being studied to see whether it has any value in medicine.

Caapi is obtained from the root and bark of the ayawasco vine, which grows over the trees and reaches a height of twenty or thirty feet. Its preparation is attended by an elaborate ceremony, which no woman must witness. If any woman watches the preparation, or partakes of the drug, she is put to death immediately.

The drug is given to the natives by the tribal cupbearer on the eve of a battle. It produces a convulsive trembling and leaves the face of the drug taker ghastly white. In a few moments these symptoms disappear, and leave an almost super-human courage and disregard of death. Later the drinker falls into a deep sleep.

The caapi had travelled two thousand miles and had almost given up hope, when the drug was discovered by chance in the possession of a tribe of Indians. The natives believe that the bark from which the drink is brewed has super-natural powers, and it was only with the greatest difficulty that a specimen was obtained.

His Hearing Restored.

The invisible eardrum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth Ave., New York city, will be given prompt reply.

Safest Way.

Silas (reading the ads)—By heck, you can learn to raise bees by mail these days.

Hiram—"That's the best way to raise 'em. Then you won't get stung."

MONEY ORDERS.

When ordering goods by mail send a Dominion Express Money Order.

As Usual.

Wisdom.

How you use to-day determines how to-morrow will use you.

Many a man thinks he is a shining light when he is only a flash in the pan.

The man who really "delivers the goods" doesn't have to knock at back doors.

A man's worst troubles are those that never happen. Remember that worry is waste.

Some men spend half a day looking for the shortest way to do a piece of work that could be done in an hour.

Time is the one thing that can never be retrieved. One may lose and regain a friend; one may lose and regain money; opportunity once spurned may come again; but the hours that are lost in idleness can never be brought back to be used in profitable pursuits.

Towels and table napkins, as well as silver, are "collected" as souvenirs by visitors staying at our big hotels. ed electrical apparatus.

FARMER'S WIFE
REGAINS HEALTH

Gives Credit to Lydia E.
Pinkham's Vegetable
Compound

Fork River, Manitoba.—"I saw in the newspapers where Lydia E. Pinkham's Vegetable Compound was doing so much good to women, and as I needed something I began to take it. I used to be very sick but I am not now. I live on a farm in the home-stead district and we have to do all our own work. I tell all the women I see what Lydia E. Pinkham's Vegetable Compound does for me. I think it saves me from going to a doctor and is the best medicine women can take."—Mrs. WM. COULTAS, Fork River, Manitoba.

Lydia E. Pinkham's Vegetable Compound is a medicine for the ailments peculiar to women. It is prepared from medicinal plants, with care and accuracy. It can be taken by women of any age.

Women make a serious mistake in allowing themselves to become so weak and nervous that it is well-nigh impossible for them to attend to their necessary household duties.

Such symptoms as pains and irregularities, all-gone feelings, backache, headache, hot flashes, nervousness, with a general run-down condition, indicate some form of female trouble.

The Vegetable Compound has brought relief to thousands of women suffering from such ailments. Let it help you.

Dutch Line

Mrs. Honey, of Lindsay, (nee Miss Archer) is visiting at the home of Mrs. M. Geeza and other friends on the Line.

Mr. T. Hoyle, Miss Mary Hoyle and friend motored to Lindsay last Sunday evening. Mr. Hoyle returned on Monday bringing Mrs. Reynolds with him.

Messrs. Ed Sharpless, Leslie Hagan, Wesley Sargent and Jack Budd were among those who went to the West on Friday. We wish them a pleasant trip.

Mrs. Wm. Ruttle is visiting her parents and other friends at Bridgenorth this week.

Mr. Ed Stata is visiting his brother, Mell for a few days.

Miss M. Bright left last week for a short visit in Toronto.

Mr. and Mrs. Len Silver, of Kinmount, visited friends on the Line on Sunday.

Mr. Jas. Reynolds visited here over the week-end.

Mrs. Robt. Schroter visited friends in Haliburton over the week-end.

Highland Grove

A successful picnic was held here August 11th. The most interesting event of the day being the football match between Wilberforce and Highland Grove resulting in a win of 3 to 1 in favor of Wilberforce. The local boys did better than was expected as they practised only a very few evenings while Wilberforce has been practising all summer.

Misses Gertie Mitchell and Annie Drury have returned to Peterboro after a visit with friends here.

The blueberries, which were a bumper crop, are about done. The raspberries were good in places.

We are sorry to report Mr. Chas. Bowen, Sr., seriously ill. We hope for a speedy recovery.

We are glad to know that no one was hurt when Mr. Mumford's car turned turtle over the embankment at No. 3 School.

We are glad to report Mrs. C. Bowen on the mend again after her serious illness.

The Saturday night dances still continue and are enjoyed by all.

Mr. J. Valentine and sons are repairing the foundation of Mr. Schofield's residence.

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

- Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

One of the many means taken to guard the children who take in the excursion is the Identification Card given to each child, with the following printed on front and back:

HALIBURTON CHILDREN'S EXCURSION

Young Canada's Day, Aug. 29, 1922

Name

S.S. No. Township

P.O., Haliburton Co.

Nearest Home Station

If the owner of this card is lost, see that the child is located with its friends as follows:

MONDAY—Y.M.C.A. Corner Dufferin and College, after 6 p.m. (Toronto time.)

TUESDAY—Exhibition Grounds all day, Grand Stand afternoon and evening, Y.M.C.A. after midnight.

WEDNESDAY MORNING—8 a.m. (Railway time) at York Station, G.T.R., Danforth Avenue.

Children will assemble at the Fountain, Ex. Grounds at 12 and 5 o'clock (Toronto time) for meals. Any child arriving late up to one hour will be met and conducted to the dining tent to join their party.

Irondale

Mrs. C. Woodcock, of Kinmount, spent last Sunday with her daughter, Mrs. Jos. Graham.

Mrs. M. J. McAlpine returned on Friday after a two months' stay with friends at Maynooth. She was accompanied home by her mother, Mrs. Green, and nieces, Misses Mollie and Nellie Flynn.

Mr. and Mrs. J. Pickens and children, of Gooderham, visited Mr. and Mrs. W. Hancock on Sunday.

Messrs. Griffen and Laidley, of Omeenee, spent a few days last week camping by the lake.

Mr. and Mrs. Stevens, of Newmarket, are with Mr. P. H. Procter, while Mr. Stevens is building their cottage.

Mrs. Joseph Graham visited friends in Kinmount last week.

Mr. Ford's mill is closed for a time, while the grain is being harvested. Men are scarce so many having left on the harvest excursion for the West.

Mr. Garfield Graham was among the harvesters on the excursion last Friday.

A gloom was cast over our neighborhood last week by the death of Mr. Ralph Flood, who passed away at the home of his father, here, on Tuesday, August 8th. The deceased, who was 33 years of age, was one of Irondale's most highly respected young men. Although a great sufferer for the past three years he bore his sufferings with great patience. He leaves to mourn his loss, his father, Mr. James Flood, and step-mother, sisters, Mrs. Fred Griffen, of Toronto; Miss Minnie, of Newbury, Mich.; also half brothers, Eric, John and Ray. The funeral took place to Gooderham cemetery on Thursday in charge of Mr. M. Fisher, of the Methodist Church.

Maple Lake L.O.L. No. 1845 will serve a free Fowl Supper to Orangemen and their wives or sweethearts in their Orange Hall, August 26th, at 4 p.m. A number of prominent speakers have been invited.

DORSET

The concert and bazaar on August 8th, under the auspices of the Ladies' Aid of the Presbyterian Church was a financial success. Messrs. Kelly and Northgrave, of Huntsville, called forth much applause with their minstrel songs and jokes. Mrs. Northgrave accompanied the singers. The Rev. Mr. Lytle assisted in the program with recitations and Irish humor. Miss Mary McKay sang "Where the Lazy Mississippi Flows into the Sea."

Miss Muriel Lockman is home for a holiday.

Mrs. Alex. McKay and family motored to Pembroke on Saturday they will remain for a few days.

Misses Christina and Kathrine McKay are home for their vacation. They will remain for the wedding of their sister, Miss Hazel, which has been announced for Wednesday, August 16.

Miss Marie Cassidy has returned to her home in Orillia, after spending a couple of weeks here, the guest of Miss Phyllis McKay.

Miss Hazel McKay gave a Trousseau Tea for her girl friends on Wednesday afternoon.

We regret to announce the death of a highly respected citizen, Mr. Thomas McNamara. The deceased was for a number of years a resident of Galway Township prior to coming here. He was in his seventy-third year and up to a year ago had enjoyed good health. He leaves a wife, by second marriage, one daughter, Mrs. T. Curtin, and two sons, Thomas and John.

TEACHER WANTED

Qualified Teacher wanted for S.S. No. 4, Stanhope. State qualifications and salary expected and apply to

JAMES WELCH
Hall's Lake

LOCAL LINES

Misses Violet and Muriel Hill, of Lochlin, are visiting with Mrs. W. A. Welch.

Mr. and Mrs. Ernest Casey are now residing at Omeenee.

Mr. and Mrs. R. J. Hartley left on Wednesday for their new home in Beaverton.

Mrs. Fulford, of Toronto, is visiting at the home of Mrs. John Gouldie.

Miss Mamie Loucks, of Glenarm, is visiting her sister, Mrs. A. Wadmore.

Mr. J. Owston, of Toronto, is visiting with Mr. Langdon.

Mrs. H. A. Willett returned on Monday after a week's visit in Toronto.

Miss D. Moore, of Kinmount, is visiting her sister, Mrs. Mark McKay.

Mrs. James Whitson, of Markham, arrived on Tuesday to visit with her friend, Mrs. W. W. Prentice.

Minden U.F.O. will meet in the Orange Hall, Saturday, August 19, re shipping of stock.

Mrs. Jos. Young left last Friday to visit in Omeenee before returning to her home in Manitoba.

Mr. J. Norrie and men are at work on the stone fence addition to the memorial at the cemetery.

Miss Mary Best, Miss Mace and Mr. and Mrs. Wm. Rouse returned on Monday to Toronto.

Miss Rhoda Norrie returned home on Saturday from Bracebridge summer school.

Mrs. M. E. Penglass, of Bessemer, Mich., is visiting her sister, Mrs. W. W. Prentice, Muskoka.

Mrs. L. Porter and little daughter, of Toronto, are holidaying with Mrs. Bert Brown.

As final arrangements for the Children's Excursion will be announced in next week's issue, it is earnestly requested that names be sent in without delay.

Mrs. John Soans and children, of Indian River, arrived on Monday to visit the former's parents, Mr. and Mrs. William Stamp.

No more sneezing summer colds! Hay Fever yields to RAZ-MAH always, just as Rheumatism, Neuritis, Sciatica, etc., will to T.R.C.'s. Sold locally by G. F. Vicars, Fenelon Falls.

Among those who left for the West on the harvest excursion were Messrs. Ben, Lawrence and Steve Harrison, Clifford and Ezra Lott, Howard Kellett, Henry Hogg, James Wright, Andy Kernohan, Jr., and Alex. Taylor.

The pupils of the Continuation School are to be congratulated on their success in the department examinations, when the second form candidates all passed, and also the first form with one or two exceptions.

DENTAL

Dr. Graham, of the firm of Drs. Neelands and Graham, Dentists, Lindsay, will be at Simpson's Hotel, Kinmount, Thursday and Friday, August 24th and 25th, and at the Hotel in Minden on Tuesday and Wednesday, Aug. 29th and 30th, and at Stanton's Photo Gallery in Haliburton, Thursday and Friday, Aug. 31st and Sept. 1st.

Mrs. J. McIntyre, of Toronto, visited her aunt and uncle, Mr. and Mrs. A. Palmer, a few days last week. Also Mr. R. J. Fleury and Mr. and Mrs. Wilton Fleury and little daughter motored through from Toronto on Saturday and receiving an emergency call returned on Sunday, accompanied by Mrs. McIntyre. Mr. Fleury on his first visit was delighted with the scenery around Minden and Gull Lake.

OBITUARY

MRS. HAMILTON HARRISON

The very sudden death, at her family residence, Lochlin, of Mrs. Hamilton Harrison, aged 50 years, has plunged the entire community in sorrow, as the deceased was very popular and had a host of friends.

She was a daughter of the late Walter Doig and Mrs. Doig, of Donald, who still survives. Her life was an exemplary one and the Methodist Church, of which she had long been a member, by her death loses one of its most active workers.

Her health had not been the best for some time but she was able to attend to various duties until Friday afternoon when she suffered a stroke and passed away in a few hours.

Her family consists of her sorrowing husband, four sons and one daughter, namely, Mrs. William Cowan, of Donald, James and Russell, of Toronto, Walter, of Lochlin, and Cecil, at home. Mrs. T. Bolton, of Donald, and Mrs. Isaac Sedgwick, of Geleert, are sisters of the deceased, while Mr. James Doig, of New Ontario is an only brother.

The funeral on Monday was exceedingly large and took place to Ingoldsby Methodist Church and thence to Ingoldsby Cemetery for interment, the service being in charge of her pastor, Rev. E. Belknap. Present from a distance were Messrs James Doig and James and Russell Harrison. Sympathy is general.

CARD OF THANKS

The Lindsay Band of the Salvation Army desire through the Minden-Echo to express their appreciation to the friends who so kindly entertained them and helped to make their visit to Minden and district a happy success.

CAPT. POLLOCK.

The Government's Conversion Scheme

The attention of the holders of the five and a half per cent war loan bonds maturing December 1, 1922, is directed to the offer of the Minister of Finance to renew the loan on favorable terms. The last Canadian loan was placed in New York at a satisfactory price. The Minister is making his present financial operation entirely a domestic one by offering to exchange the maturing bonds for new bonds bearing the same rate of interest, running for either five years or ten years as the bondholder may prefer. A further inducement to the investor is that he receives a bonus of one month's interest. The terms offered are decidedly favorable to the investor and it is probable that a large part of the maturing loan will be renewed. Arrangements for the exchange of bonds can be made at any branch of the chartered banks. Holders who do not wish to reinvest will be paid in cash on the 1st December.

BIRTHS

MCLEOD—On Saturday, August 12th, at 113 Helena Ave., Toronto, to Mr. and Mrs. Jas. McLeod, (nee Jessie Graham) a son (John James Graham).

What Men Admire Most in Women is Perfect Health —the Sign of Strength

Barrie, Ont.—"I was suffering from a rundown system some time ago, was unfit to perform my daily duties, and was advised to try Dr. Pierce's Favorite Prescription. I tried it, took two bottles, and was restored to my natural strength. I cannot praise Dr. Pierce's medicine too highly and will be willing to write to any one sending a stamped envelope."—Mrs. A. H. Bishop, R. R. No. 1.

Mothers, Advice for You!

London, Ont.—"I wish I could tell all the women in the world who suffer with woman's trouble, what a wonderful medicine Dr. Pierce's Favorite Prescription is. My earliest experience with it was during my first expectancy. I became dropical and my people were quite alarmed about my condition. The doctor's medicine did not seem to reach my trouble at all so my husband urged me to try Dr. Pierce's Favorite Prescription, and to please him I did. Before I had finished the second bottle the distress and dropsy left me and I felt in absolutely perfect health. I had no further trouble from that time on. I afterwards took Favorite Prescription whenever in a nervous rundown condition and it always strengthened and built me up."—Mrs. Lily Stoddart, 438 Ontario St.

The Pioneers

BY KATHARINE SUSANNAH PRICHARD

Copyright by Hodder and Stoughton

Synopsis of Preceding Chapters.

Donald and Mary Cameron are carving a home out of the Australian wilds. When little David was four months old his father set off to Port Southern for fresh supplies. On the fourth day two gaunt and ragged men, one of them wounded, entered the hut. Mary offered them unstinted hospitality and heard the story of their escape from the Island prison and the treachery of McNab who had promised to befriend them—at a price. Clothed and provided with food, they departed, the tall one hoping to repay the debt. Mary refused to aid her husband in putting the police on their track.

CHAPTER VII.

In ten years, Cameron's had become the biggest clearing in the hills, as it was the oldest. Many others had been made and were scattered throughout the lower ranges overlooking the Wirree plains, though at great distances apart; ten, twelve and sometimes twenty miles lying between neighboring homesteads.

The hut that had been Donald and Mary Cameron's first home had been broadened by the addition of several extra rooms. Floors had been put down and a wide verandah spread out from them. Every room had a window with four small glass panes. The window-sills, verandah posts and doors had been painted green, and the whole of the house whitewashed. Its bark roof had given place to a covering of plum-colored slates; there was even a coin or two of grey and golden lichen on them, and the autumn and spring rains drummed merrily on the iron roof of the verandah. Creepers climbed around the stone chimney and the verandah; clematis showered starry white blossom over the roof and about the verandah posts.

A little garden, marked off from the long green fields of spring wheat by a fence of sharp-toothed palings, was filled with bright flowers—English marigolds, scarlet geraniums, pink, yellow and blue larkspurs—and all manner of sweet-smelling herbs—sage, mint, marjoram and lemon thyme. The narrow, beaten paths that ran from the verandah to the gate and round the house were bordered with rosemary. And in the summer a long line of hollyhocks, pink, white and red, and red and white, waved, tall and straight, at one side of the house. The edge of the forest had been distanced so far on every side of the clearing, except one, that the trunks of the trees showed in dim outlines against it, the misty, drifting leafage swaying over and across them. Only on the side on which the track climbed uphill from the road, the trees still pressed against the paddock railings.

A long white gate in the fence where the road stopped bore the name Donald Cameron had given his place—"Ayrmuir." It was the name of the estate he had worked on in Scotland when he was a lad. It gave him no end of satisfaction to realize that he was the master of "Ayrmuir," and that his acres were broader than those of the "Ayrmuir" in the old country; not only broader, but his to do what he liked with—his property, unencumbered by mortgage or entail.

On the cleared hillside about the house, crops of wheat, barley and rye had been sown. An orchard climbed the slope on the left. Behind the old barn and the stables were a row of haystacks. The cowsheds and milking yards were a little further away. Round the haystacks and about the barn a score of the buff and butter-milk-colored progeny of Mother Bunch, a few speckled chickens, black and white pullets, and miscellaneous breeds of red-feathered, and long-legged, yellow fowls, scratched and pecked industriously.

Donald Cameron farmed his land in the careful fashion of the Lowland Scots. There was perhaps here and there a crooked line in his fields and a rick awry behind the barns. But all was neatness and order, from the bee-hives which stood with their pointed straw bonnets beneath the apple trees, to the cowsheds, where newly-cut bracken was laid every day or two for the cows to stand in when they were milked. There was no filth or squelching morass in his cow-yards. The pigs wandered over the hills rooting under the tender grass. Scarcely a straw was allowed to stray between the back of the house and barns. In the feed-room, the harness-room, in every shed and yard, the meticulous precision and passion for order which characterized all that Donald Cameron did, was maintained.

There were changes indoors as well as out. A long straight kitchen, with a bricked floor and small window looking out on to the yard, had been added to the original home. On the east side, two rooms had been built, and a small limewashed shed behind the kitchen served for a dairy. In it, on broad, low shelves against the wall, the rows of milk pans, with milk setting in them, were ranged; a small window in the back wall framed a square of blue sky. When Mrs. Cameron was making butter, the sound of the milk in the churn, the rumble and splash of the curdled cream, could be heard in the yard. The sweet smell of the new butter and buttermilk hung about the kitchen door.

Ten years of indefatigable energy, of clearing land, breaking soil, raising crops and rearing cattle, doing

battle with the wilderness, overcoming all the hardships and odds that a pioneer has to struggle against, had left their mark on Donald Cameron. Every line in his face was plowed deep.

His expression, gloomy and taciturn as of old, masked an internal concentration, the bending of all faculties to the one end that occupied him. Always a man of few words, as the farm grew and its operations increased, he became more and more silent, talking only when it was necessary and seldom for the sake of companionship or mere social intercourse. His mind was always busy with the movements of cattle, branding, mustering, breeding, buying and selling prices, possibilities of the market. He worked insatiably.

He was reminded of the flight of time only by the growth of his son—a gawky, long-limbed boy.

As soon as he could walk Davey had taken his share in the work of the homestead, rounding up cows in the early morning, feeding fowls, hunting for eggs in the ripening crops, searing birds from the plowed land when seed was in, and cutting ferns for the cowsheds and stables. His father was little more than a dour taskmaster to the boy. Davey had no memory of hearing him sing the gathering song of the Clan of Donald the Black.

His mother had taught him to read and count as she sat with her spinning wheel in the little garden in front of the house, or stitching by the fire indoors on winter evenings. Davey had to sit near her and spell out the words slowly from the Bible or the only other book she had, a shabby little red history. Sometimes when he was tired of reading, or the click and purr of her wheel set her mind wandering, she told him stories of the country over the sea where she was born. Davey knew that the song she sang sometimes when she was spinning was a song a fairy had taught a Welsh woman long ago so that her spinning would go well and quickly. She told him stories of the tylwyth teg—the little brown Welsh fairies. There was one he was never tired of hearing.

"Tell me about the farmer's boy who married the fairy, mother," he would say eagerly.

And she would tell him the story she had heard when she was a child.

"Once upon a time," she would say, "ever so long ago, there was a farmer's boy who minded his father's sheep on a wild, lonely mountain side. Not a mountain side like any we see in this country, Davey dear, but bare and dark, with great rocks on it. And one day, when he was all alone up there, he saw a girl looking at him from round a rock. Her hair was so dark that it seemed part of the rock, and her face was like one of the little flowers that grow on the mountain side. But he knew that it was not a flower's face, because there were eyes in it, bright, dark eyes, and a mouth on it . . . a little, good mouth, with tiny, white teeth . . . it. They played on the mountain together for a long time and sometimes she helped him to drive his sheep. After a while they got so fond of each other that the boy asked her to go home with him to his father's house, and he told his father that he wanted to marry her. "That night a lot of little men, riding on grey horses, came down from the mountain on a path of moonlight and clattered into the farmyard of the farmer of Ystrad. The smallest and fattest of the men, in a red coat . . . they all wore red coats, and rode grey horses. Did I say that they all rode grey horses, Davey?"

"Yes, mother," Davey breathed. She had this irritating little way of going back a word or two on her story if a thread caught on her wheel. "Well—" she began again, and, as likely as not, her mind taken up with the tangled thread, would add: "Where was I, Davey?"

And Davey, all impatience for her to go on with the story, though he could have almost told it himself, would say: "And the smallest and fattest of the men, in a red coat—" "Oh, yes!" Mary started again: "Strode into the kitchen and pinched the farmer's ear, and said that he was Penelop's father . . . the girl's name was Penelop . . . and that he would let her marry the farmer's son, and give her a dowry of health, wealth and happiness, on condition that nobody ever touched her with a piece of iron. If anybody put a piece of iron on her, Penelop's father said, she would fly back to the mountain and her own people, and never more sit by her husband's hearth and churn or

—Johnson, British and Colonial Press

spin for him. So the farmer's boy married Penelop and very happily they lived together. Everything on the farm prospered because of the fairy wife, though she wore a red petticoat and was like any other woman to look at, only more beautiful, and always busy and merry. She made fine soup and cheese, and her spinning was always good, and everybody was very fond of her. Then one day when her husband wanted to go to a fair, she ran into the fields to help him to catch his pony. And while he was throwing the bridle, the iron struck her arm—and that minute she vanished into the air before his eyes."

She paused for Davey's exclamation of wonderment and then continued:

"Though he wandered all over the mountain calling her, Penelop never came back to her husband or the two little children she had left with him. But one very cold night in the winter, he wakened out of his sleep to hear her saying outside in the wind and rain:

"Lest my son should find it cold,
Place on him his father's coat.
Lest the fair one find it cold,
Place on her my petticoat."

Mary sang the words to a quaint little air of her own making, while Davey listened, big-eyed and awestricken.

"When the children grew up they had dark hair and bright, sparkling eyes like their mother," she would conclude, smiling at him. "And when they had children they were like them, too, so that people who came from the valley where the farmer's boy had married the fairy were always known by their looks, and they were called Pellings, or the children of Penelop, because it was said they had fairy blood in their veins."

Davey had always a thousand questions to ask. He liked to brood over the story; but he learnt more than fairy tales from his mother's memories of the old land. Her mind was beginning to be occupied with thoughts of his future. She and her husband were simple folk. Cameron could barely read and write, and what little knowledge Mary possessed she had already passed on to Davey. She knew what Donald Cameron's ambitions were, and after ten years of life with him had little doubt as to their achievement. The position that it would put Davey in had begun to be a matter of concern to her.

(To be continued.)

When Moonlight Falls.

When moonlight falls on the water,
It is like fingers touching the chords
of a harp

On a misty day,
When moonlight strikes the water
I cannot get it into my poem—
I only hear the tinkle of ripples of light.

When I see the water's fingers and the
moon's rays
Intertwined,
I think of all the words I love to hear
And try to find words white enough
For such shining.

Minard's Liniment for Dandruff

Royal Accomplishments.

Princess Mary of England, whose marriage to Lord Lascelles recently occurred, is extremely popular; indeed she is a close second to her brother, the Prince of Wales. Before the war she was little known except as the constant companion of her mother, the Queen; and persons were inclined to smile at a certain shy girlish princess that characterized her in public. Then, too, there was her inevitable little correct, tightly clutched umbrella, which it was whispered her teasing brothers had dubbed "Mary's twin." But the war made known her good sense, her good feeling and her readiness for real work.

The princess has a wholesome, natural taste for domesticity and outdoor recreation. She has no very marked talents or hobbies; but not long ago at an exhibition in the interest of children, where model nurseries planned by different distinguished persons were displayed, one of the most practical and pleasing was that which Princess Mary had designed.

The princess's mother, Queen Mary, has no special talents. Neither had Queen Victoria, unless perhaps it was a talent for music; she had a pleasing voice and a good ear and once sang two of Mendelssohn's songs for the composer himself in a manner to win his sincere commendation to others afterwards as well as his compliments at the moment.

In France much more than in England Sovereigns and princes have attempted arts and crafts, usually without great success. Louis XIV. thought well of himself as a cook and liked to potter over soups and sauces concocted in a special set of silver saucepans. Louis XVI. was a fairly good locksmith. His ill-fated queen, Marie Antoinette, loved to sing and act in the little theatre at the Trianon; but despite her beauty and her natural grace off the stage she was always awkward upon it. As for slinging, she had neither a good voice nor a true ear. But of course her performances were always applauded to the echo, although it was sometimes difficult to obtain a full house. Once the Swiss guards in full uniform were ordered in to fill the empty seats.

The usual quality of royal accomplishments was perfectly summed up in the famous answer of the clever and charming court painter, Madame Vigee-Lebrun. A duke of the royal house, who had been rendering a song very badly, turned to her suddenly and asked, "Well, madame, and how do you think I sing?"

"Like a prince, monseigneur," was the reply.

Quite True.

Little Boy—"Mother, are there any men angels in heaven?"
Mother—"Why, certainly, dear."
"But, mother, I never saw any pictures of angels with whiskers."
"No, dear. Men only get in with a close shave."

Minard's Liniment for Burns, etc.

Hard times are good times to work hard.

Let the Sun's Rays Do Your Cooking

The time may yet arrive when on clear days, even in winter, the housewife will forsake her range and, stepping out into an attached "sunshine kitchen," roofed with glass, do her cooking by the heat of the sun. It is no mere dream. Indeed, the idea promises literal fulfillment in the near future, a number of inventions having already gone far toward proving it practicable.

Cooking by sun's rays has several obvious advantages. It means no dirt, no ashes and no cost for fuel. Thus in Egypt and the African Karroo solar cookers of a simple pattern are even now in common use, the device employed for the purpose being an insulated box of oakwood blackened inside and fitted with a glass top. It makes a highly efficient oven for baking, and may be utilized in the preparation of soups and stews, the temperature inside the box running up to 275 degrees Fahrenheit in the middle of the day. With the help of a mirror it can be raised much higher than that.

We all know what a glass cover will do to hold the sun's heat—as illustrated by so familiar a thing as the "cold frame" used for raising early vegetables. The solar rays pass through the glass, contributing to the air beneath a warmth which does not easily escape even in the winter time.

Upon this principle most of the "sun ovens" are based. One of them is the invention of a Chicago man, Ebenezer Sprigg, and may be described as a large box covered with glass and lined with metal painted black to absorb heat. When it is exposed to the sun enough heat is generated to boil water and make steam, the latter passing into a cooking chamber above.

An apparatus of this kind is a real fireless cooker, requiring no fuel to furnish heat to start with. You can make one for yourself, of more simple pattern, very easily. Take a wooden box, paint it black inside, and cover it with two sheets of glass separated by an inch of air space. The inch of dead air is a capital insulator. Put the box in the sun and soon the temperature of its interior will rise above

boiling. You can cook eggs or meat in it. If you will make the box double—putting one box, that is to say, inside of a box slightly larger—and fill the space between with sawdust or other insulating material, you can get a tremendous heat.

How, it may be asked, shall you place in your sun oven the things you want to cook? That can be managed in various ways; but a very practical suggestion on this point is offered by another inventor, who proposes to rest the box on one of its edges—the upper two of its four sides covered with double glass, and the lower two sides lined with black felt for insulation. Shelves inside are arranged so as always to adjust themselves horizontally, no matter how the box is tilted, to receive the solar rays, and upon them pans of bread or other food receptacles are put.

A British army officer in India some years ago devised what he called a "cooking box," a most ingenious affair, of wood lined with mirror glass, conical in shape and eight-sided. At the bottom was a small copper boiler, with a cover of plain glass to retain the heat concentrated by the mirrors upon the boiler. By this means steam was generated when the box was exposed to the sun. If the steam was retained the result was a stew or boil; if allowed to escape, the food placed in the receptacle was baked. In an apparatus of this kind rations for seven men, including meats, were prepared in two hours. It was obvious that by increasing the diameter of the box the heat could be augmented indefinitely.

In Egypt, the Sudan and Algeria, where water fit for drinking is apt to be scarce, there is to-day in common use a portable solar distilling outfit which is the invention of a Frenchman named Mouchon. It is a simple arrangement of boiler and concave mirror, the latter serving to focus the sun's rays upon the former, while a coil of tubing in a water-jacket does duty as a condenser. The machine, which a man can carry on his back, will boil a quart of water and keep it boiling, the ordinary output being two gallons of pure drink per day.

It is Not Easy, But It Pays

To acknowledge it when you are wrong.

To admit that you have made a mistake.

To take your medicine; to stand up under rebuffs, or unjust criticism. This is the kind of stuff that builds big men, big women.

To keep your temper when others all about you lose theirs and go to pieces.

To keep your poise, your mental balance under trying conditions. Others will respect you more; you will respect yourself more, and you will have infinitely more influence. Nothing else quite takes the place of a superb poise in all situations in life.—Success.

Tropical Valley in the North

Discovery of an almost tropical valley with rivers of boiling water, many mineral springs, abnormal plant growth and abounding with game in far northern British Columbia, is reported by Frank Perry, mining engineer, of Vancouver, back after seven years spent prospecting the weird valley close to the Yukon border.

For mineral reasons, Mr. Perry, at the present time, is not divulging the exact location of the "hot water" valley, which he came upon in the depth of winter. The unusual sight of a heavy fog in a winter attracted him to the valley, and later exploration showed it to be approximately 200 miles long and about 40 miles wide. Rivers

of hot water ran through it fed by hundreds of hot springs, which bubbled out of the ground in all directions.

Mr. Perry reported he saw many wild animals. These congregated due to the luxuriant vegetation made possible by the heat generated by the springs, and in the valley were hundreds of mountain sheep and goats, caribou and moose, also with bears and other fur-bearing animals. The moose, almost square from fat, were so tame that he has been able to walk amongst them and could almost touch them. The Indians, although knowing the valley to be a hunter's paradise, never visit it through the superstition that prehistoric animals still roam the district.

WHEAT CROP OF CANADA, 1922, ESTIMATED AT 320,968,000 BUSHEL

Bureau of Statistics Estimates Show Big Yield of Oats, While Barley, Rye and Hay Also Reach Huge Figures—Potato Crop Reported Good.

A despatch from Ottawa says:—Canada's wheat crop this year is estimated at 320,968,000 bushels, or slightly more than twenty million bushels larger than the final estimate of last year's crop, by the Dominion Bureau of Statistics. This estimate is on conditions prevailing in Canada at the end of last year and is arrived at by compiling the yield from crop correspondents in the Department. The estimate of oats is 509,752,000 bushels, as against 426,232,000 bushels last year, and of barley, 64,881,000 bushels, as against 59,709,100 bushels in 1921. It is estimated that the yield of rye will be 87,848,000 bushels, as compared with 21,455,260 last year, and flaxseed, 4,580,000 bushels in comparison with 4,111,800 bushels in 1921. The estimated yield of potatoes, 102,974,000 bushels, is smaller than last year's final estimate, which was 107,346,000 bushels. The average yield per acre of Fall wheat is estimated to be 22½ bushels as against 21½ bushels last year. The total yield of hay and clover is estimated at 15,545,000 tons, which is the largest on record, with the exception of that for 1910, when the yield was 16,348,000 tons. Last year the total yield was only 11,366,100 tons. Of alfalfa (first cutting), the total yield is 483,000 tons as against 662,200 tons in 1921.

Conditions throughout Eastern Canada continue to be favorable, says the

report. In the Prairie Provinces good rains have fallen throughout Manitoba and prospects in this province are favorable. In Saskatchewan the crops in the southern district are generally excellent, but in the central and northern districts they have suffered considerably from drought and the yields indicated on August 1 are considerably below average. In Alberta the southern districts have received ample moisture, but prospects in the central and northern districts are poor owing to drought. British Columbia has also suffered from drought.

For the three Prairie Provinces the forecast in bushels is as follows, the figures in brackets indicating the finally estimated yields of 1921:

Wheat, 297,781,000 (280,098,000); oats, 304,869,000 (284,147,500); barley, 45,473,000 (44,681,600); rye, 35,073,000 (19,109,700); flaxseed, 4,360,000 (3,945,700). For Manitoba the yields in bushels are: Wheat, 53,444,000 (39,054,000); oats, 73,028,000 (49,442,500); barley, 24,534,000 (19,681,600); rye, 4,240,000 (3,564,700); flaxseed, 611,000 (544,700). In Saskatchewan they are: Wheat, 175,100,000 (188,000,000); oats, 154,669,000 (170,513,000); barley, 10,209,000 (13,343,000); rye, 27,893,000 (13,546,000); flaxseed, 3,561,000 (3,230,000). In Alberta they are: Wheat, 69,237,000 (53,044,000); oats, 77,172,000 (64,192,000); barley, 10,730,000 (11,657,000); rye, 2,940,000 (1,999,000); flaxseed, 188,000 (171,000).

Personal Liability for Fire Bill Drafted

A despatch from Vancouver says:—A draft of the proposed personal liability for fire bill was read and endorsed at the annual meeting of the Association of Canadian Fire Marshals here on Thursday.

This Act, which will come into force 60 days after receiving royal assent, will be adopted by every province in the Dominion. The purpose of the Act is to enable fire departments to recover the cost of extinguishing fires from persons, who, through criminal negligence, are responsible.

IRREGULARS LOSING IN IRISH CIVIL WAR

Nationals Took Town of Tralee—Public Buildings Prey to Flames.

Dublin, Aug. 13.—Despite the boasts of Humphrey Murphy, insurgent leader, that Tralee could hold out for three years against any force the Government sent against it, Tralee has fallen into the hands of the Nationals. The people of the town are rejoicing in the Free State victory even more than the victorious troops. Meanwhile the Irregulars continue their policy of hit and run, according to reports from Limerick. They are now retreating toward the hills, with

the Nationals following closely at their heels.

Reports say demoralization is creeping into the ranks. Many officers and men are known to have abandoned the sword for the plow, but some of these are acting in the triple capacity of husbandman, road wrecker and gunman. As a result of recent National successes, telephone and telegraph service is improving in the country, and roads are being mended rapidly. Practically all County Limerick is in the hands of the Free Staters, as are the adjoining portions of Tipperary. No firing is taking place on all sides. Cork on the south, Kerry on the west, Limerick and Tipperary on the north, and Waterford in the east.

The quick collapse of Cork city indicates the Irregulars' plan no big stands in the cities, and it is expected all the towns will be in the hands of the Nationals in a few days. They are continuing their advance of Kilkenny through an exceedingly difficult country. The country is hilly, roads are treacherous and blockaded, bridges have been blown up and railways damaged.

However, the Nationals hope to clear Kilkenny and the South Kerry area, where the cable stations, loss of which is interfering with trans-Atlantic communication, are stationed, in a short time.

Liverpool, Aug. 13.—Persons arriving here from Cork yesterday stated that the Government House and other buildings in the city are burning.

Others reaching here from Queens-town reported that some official buildings in that port are on fire. The latest advices received from Cork are to the effect that, with the exception of

HE ERECTED A MONUMENT THAT WILL LIVE FOREVER
—Capel, British and Colonial Press

PRESIDENT FAILS TO AVERT GENERAL TIE-UP OF U.S. TRANSPORTATION

Washington, Aug. 13.—President Harding's latest effort to settle the railroad shopmen's strike collapsed here to-day on the seniority issue, and the country now faces the prospect of a general transportation tie-up, with the non-striking operatives of the railroads contributing to the cause of the shopmen by refusing to take out defective equipment or to work under protection of armed guards.

Efforts of the heads of the "Big Four" brotherhoods, in the role of mediators for the shopmen, it was disclosed, had failed last night in a final conference with the committee of the Association of Railroad Executives, brought about, it is understood, at the suggestion of President Harding.

At that conference the brotherhood officials proposed that the issue of seniority, instead of being referred back to the Railroad Labor Board, as

President Harding suggested, be submitted to some form of outside arbitration. That was their only suggestion. It was emphatically rejected by the railroad Executives, who insisted that they must stand their ground on the seniority issue, and that railroad employees, under the decision of the Railroad Labor Board, when they go on strike in defiance of the board's rulings, automatically cease to be employees of the railroads, or within the jurisdiction of the board, and lose their seniority status.

President Harding was informed this morning by the Railroad Executive's Committee that last night's conference had failed, and that there appeared to be no prospect of settlement. The President is said to have expressed great regret over the unfavorable outcome, but he made no further suggestions.

the postal service, conditions are normal.

During the burning of the barracks and other buildings there, several of the Irregulars were entrapped and had to be rescued by means of bombs and rifle firing created terror among the residents.

5,000 Lives Lost in Chinese Typhoon

A despatch from Hongkong says:—Five thousand persons are believed to have lost their lives in a typhoon that swept over Swatow, 250 miles north of here, on Wednesday night. Dead bodies are floating in the harbor amid the wreckage and nearly every house in the city was damaged. The flood following the wind drove all the inhabitants from their homes.

Warehouses were demolished by the storm and their contents lost or extensively damaged. Two British steamers were swept ashore and their cargoes, it is believed, will be lost for pirates before they can be salvaged.

Swatow is a port of 50,000 to 60,000 inhabitants at the mouth of the River Han, near the eastern border of the province of Kwang-tung. It is the port for the city of Chao-an-Hsien, twenty-five miles inland.

LIEUT. COL. W. G. BARKER
V.C., D.S.O., M.C.

The famous aviator, who has just returned to Canada after a visit to England, says that the British plans for building a fleet of 500 aeroplanes are inadequate and that 5,000 would be a more suitable number. He says that the war of the future will largely be decided in the air, and that the great speed of the latest types of aeroplanes is such that no range-finder could follow them, and they would be immune from gunfire.

British Reply to Poincare's Proposals

A despatch from Paris says:—In a note handed to the allied delegations at London on Thursday night, according to a Havas despatch from London, the British definitely outlined their attitude with regard to Premier Poincare's proposals. The plan for a 26 per cent. tax on German exports, says the despatch, is accepted by the British, as are also the proposals for seizure of the customs and the control of mines and forests, but the latter control is agreed to only conditionally upon the Germans continuing recalcitrant and maintaining their opposition to the new customs lines.

DEATH OF GRIFFITH LOSS TO IRISH CAUSE

King George Sends Message of Sympathy to Widow of Sinn Fein Founder.

Dublin, Aug. 13.—The death of Arthur Griffith has had a stunning effect upon a majority of the people of Dublin, who recognized in him the greatest force behind the Anglo-Irish treaty. Prayers were said in all the Catholic Churches to-day for the repose of the soul of Mr. Griffith and there were many signs of mourning throughout the city. Numerous expressions of sympathy have been received by Mrs. Griffith, among them a message from King George, the Irish political leaders and the Irish Bishop. After tendering his sympathies the message of King George added:

"In spite of his untimely death, I pray that Ireland may soon receive the peace for which he labored."

The Irish Government has issued a statement expressing its firm determination to carry on the life work of Mr. Griffith to "the achievement which he so nearly realized."

Arthur Griffith was 50 years old and a native of Dublin.

The little toe is degenerating, owing to the shape of modern footwear, and in a century or so it will disappear altogether, according to one doctor.

The news from England of the opening of a great refinery in Swansea, Wales, by the Anglo-Persian Oil Company putting that company in a position, according to report, to supply at least one-third of the total consumption of the British Isles, with a daily production of 150,000 gallons, is of interest to the Maritime Provinces where this company is undertaking developments in the oil shales of New Brunswick and Nova Scotia.

Maple products—Syrup, per imp. gal., \$2.20; per 6 imp. gals., \$2.10; Maple sugar, lb., 20c.

CENTRAL UNITED STATES SOFT COAL MINERS TO RESUME WORK

A despatch from Cleveland, O., says:—Coal operators represented here and miners of Ohio, Indiana, Illinois and Western Pennsylvania on Thursday agreed to make a contract permitting immediate resumption of soft coal mining in the central competitive field, named a general committee to work out the details of the contract and adjourned subject to the completion of the committee's work.

According to John L. Lewis, the making of an agreement with the operators represented here means that within the week 75 per cent. of the 600,000 men who have been on strike will be back at work, leaving the only idle properties those included in fields non-union prior to April 1st, and that the United Mine Workers have won their strike.

The decision to make a contract without the co-operation of the operators' organizations of Illinois and Indiana was reached after the policy committee of the miners had met. The committee decided to wait no longer for the bulk of the Indiana and Illinois operators and make an agreement with the operators here willing to resume on the basis of the old

scale until April 1, and set up machinery to lay plans for the making of a scale to be effective after that date.

The conference formally organized Thursday afternoon, with Michael Gallagher, manager of the Hanna Coal interests, as chairman, counted noses and found operators representing 40,000,000 tons, present, and willing to work on the present 27,960,000 tons scale. On the other side, which has a normal production of 41,000,000 tons a year, 7,800,000 of Western Pennsylvania's 50,000,000 tons, 2,470,000 of Indiana's 30,000,000 and 1,800,000 of the 30,000,000 capacity of Illinois. In percentages this figures 62 per cent. of Ohio, 15 per cent. of Western Pennsylvania, 8 per cent. of Indiana and 2 per cent. of Illinois.

In addition to this, a considerable tonnage of all four States represented here, but not actually taking part in the conference, is understood to be willing to sign contract when completed, while a large part of Illinois and Indiana, officially against any settlement that does not involve an agreement to arbitrate everything on the expiration of the contract, is declared to be wavering.

Harburn Heralds

Master Hugh McCullough, of Lindsay,
is spending his holidays at Mrs. A. Curry's.

During a severe electrical storm last
week Mr. John Wilson's house was struck
and some of the inmates felt a slight shock
but no damage done.

Mrs. Thos. Roberts, who has been ill for
the past month, has gone to Lindsay for
medical treatment. She was accompanied
by her daughter, Velma.

Mr. and Mrs. Sherry, of New Jersey,
motored up to Crooked Lake for their
annual holiday.

Messrs. G. Wilson and Walter Roberts
have gone West on the harvest excursion.

Mr. and Mrs. Iles, of Haliburton, visited
relatives here on Sunday.

Miss M. V. Roberts has returned from
Queen's University, Kingston, to spend
the holidays with her parents.

Several parties of tourists are camped
at Fort Irwin enjoying the fine weather,
fishing and also a few mosquitoes that are
still lively.

IN MEMORIAM

Items under this heading
5c per line

In Memory of our daughter, Violet
Keefer, who died August 9, 1919, age 8
years, 8 months and 28 days.

Three years have passed since that sad
day.

God called our darling Violet home.
Forget her? No, we never will,
For in our hearts we love her still.

Violet has gone through the beautiful
gates
Away to the City of Gold,
Which knows no sorrow, sin or pain.
Violet is safe in the heavenly fold.

Swift was the message, short was the
warning.

And pain is the lesson to all—
At life's busy noontide or evening or
morning

Be ready, for the Master may call.

Sadly missed by
MOTHER, FATHER, BROTHERS

In Memory of Pte. Herbert Baker, who
died at Amiens, France, August 10, 1918.
"Lest we forget."

S. ZALKIN
HALIBURTON - ONT.

The farmer cannot continue to sell
his produce for less than the cost of
production any more than he could
live in a vacuum. Out of the reduced
proceeds of what he sells, the farmer
is obliged to pay extraordinary prices
for everything that he buys. I be-
lieve that our national progress and
prosperity are bound up with the
progress and prosperity of our farm-
ers. Any policy which cripples the
farmer will bear evil fruit, and will
dry up the fountains of national
prosperity.

Utilizing Unmarketable Potatoes.

Unmarketable potatoes add suc-
culence to the dairy ration. Where
corn silage is not available and there
are plenty of small potatoes, a peck
a day will give an increase in milk
flow. They should be introduced into
the ration gradually and be run
through a root cutter to avoid the
possibility of choking the animal.
